

NewTechWood

The Look of Wood Without the Work

Eco-Friendly Composite: Decking, Siding, Deck Tile, Railing, Bird Feeders

The Look and Feel of Real Wood Comes at a Price

- Wood is expensive and requires on-going, costly maintenance.
- The family deck has to be stained and water-proofed with toxic chemicals.
- The wooden siding needs an expensive paint job every few years.
- Wooden fencing requires constant repair, and time-consuming paint jobs to keep up appearances.
- Real wood accents add to the cost of any home improvement or new construction.
- You have less time to enjoy your family and your home because your exterior wood always needs something.
- The planet suffers as more wood is harvested to meet the ever-growing demand for natural-looking wood.

NewTechWood uses select, recycled, high-density plastics, combined with recycled wood products, to create a composite wood substitute that drops your energy footprint to zero. NewTechWood is made from recycled materials, and it's 100% recyclable down the line.

When you want the look of real wood, but you don't want the headaches of maintaining that beautiful façade, NewTechWood solves the problem.

NewTechWood with **Natural** lasts longer, requires less maintenance, and it puts recycled materials to good use creating the natural look of wood without all the work.

UltraShield[®] Natural[™] Brazilian Ipe Decking in South Africa

NewTechWood's UltraShield® : The Look of Wood Without the Worry

NewTechWood's **UltraShield®** uses recycled wood and plastics to create a fully-customizable improvement on traditional wood building products. NewTechWood delivers the natural look of wood without on-going, time-consuming maintenance and expense.

NewTechWood looks like wood, but it's durable, environmentally friendly, and you won't spend hours staining and sealing your deck or home siding.

Naturale
Surface

Using its patent-pending process, called **Naturale™**, **UltraShield®** delivers convenience, reliability, and a realistic texture that, not only makes your life better, all NewTechWood products combine the proven strength of high-density, recycled plastic with realistic wood fibers to deliver the look of **Naturale™** wood; the look you demand.

UltraShield
Coating Layer

UltraShield® : Ultra-Simple

UltraShield® is enclosed in an impermeable seal so your **UltraShield®** deck or home siding stands up to weather, sun, water, scuffs and scrapes. Your home looks good down the line because, with **UltraShield®**, durability is built in.

What makes NewTechWood **UltraShield®** the best choice for homeowners and contractors?

- **strength and durability:** NewTechWood is stain-proof, mildew- and mold-proof, no cracking, no need for oiling or painting.
- **convenience:** NewTechWood is easy to install and ultra-easy to maintain.
- **appearance:** NewTechWood looks like real wood – even up close.
- **cost:** NewTechWood products deliver value, while adding value to your home.
- **living space:** a NewTechWood deck adds outdoor living space for the entire family to enjoy, and at a low cost.
- **premium fabrication:** NewTechWood uses the finest in recycled materials to deliver the highest-quality product to homeowners and homebuilders.
- **environmentally-friendly:** NewTechWood is fabricated from recycled wood and plastic, and it's 100% recyclable, leaving no carbon footprint. Go green. Look great!

UltraShield **Naturale™** Roman Antique Decking in South Africa

UltraShield[®] Naturale[™] Spanish Walnut Siding in Australia

THINK GREEN! GO GREEN!

Concerned, responsible families care about the future of our planet. They recycle, preserve, and protect the natural beauty all around us.

Now, you can, too, with NewTechWood's commitment to a cleaner, brighter future for our planet and future generations.

What Makes NewTechWood the Smart Green Choice?

All NewTechWood products are produced using 95% recycled materials including plastic bottles, reclaimed wood fibers, and other products that would normally end up in a landfill.

NewTechWood undertakes annual, third-party audits to assure compliance with environmental, health, and safety regulations and guidelines – a demonstration of our commitment to a greener alternative to wood building products that deplete the planet's resources.

NewTechWood shrinks your home's carbon footprint by using recycled materials constructed to be recycled again in the future.

NewTechWood conserves home energy use.

Our production processes are environmentally-friendly using energy-saving techniques to create an even greener composite that lasts for decades.

NewTechWood has been recycling plastics for 30 years. Every single month, our company saves 12,000,000 pounds of plastic from ending up in our cramped landfills.

We control the fabrication process from start to finish, including proper plastics preparation, sorting and screening raw materials, so we know exactly what each NewTechWood product contains, ensuring product consistency and integrity to the highest standards.

Because we manage production from recyclable collection to manufacture and delivery, we can provide stable pricing, and reliable product availability.

25 Year
Warranty

The UltraShield[®] Comprehensive Warranty

It's really simple.

Our **UltraShield[®]** decking is backed by the most comprehensive warranty in the industry.

NewTechWood stands behind its products, backed by a 25-year limited, transferable warranty. We are so confident in the quality of our decking that we'll refund the cost or replace the decking if it underperforms.

That's really simple, so you have nothing to lose.

Decking Accessories

NewTechWood decking is super-simple to install.

Using a system of locking clips, NewTechWood installs quickly, but more than that, our proprietary controlled expansion and contraction clip eliminates warping, or any distortion of our industrial strength planking, providing decking that lasts for years with simple, easy maintenance.

Your NewTechWood deck expands and contracts under various weather conditions without creating wear and tear on individual planks using our easy to install clip systems that keep your deck looking its best for years to come.

Install it once, and forget it.

T Clip System		Mini Clip System	
			
 TC-2 UltraShield	 TC-1 UltraShield Joist	 MG-1 UltraShield Joist	 MG-2 UltraShield Joist
TC-2 (CEC Clip)	TC-1 (Locking Clip)	MG-1 (CEC Clip)	MG-2 (Locking Clip)

Due to the small gap of the MG Clips there might be differences in gap sizes after installation as the composite itself has width tolerances.

Please contact the manufacturer to understand if this clip is approved to be installed in your area.

Starting Clip

Setting the first board is easy using NewTechWood's MG-3 Starting clip. They're invisible, easy to install, and these clips last and last so you don't have to worry or fuss over your new installation.

End Caps

When you employ our lightweight, hollow core decking, these end caps finish the job, creating a clean, **Naturale** look that's guaranteed to last for years to come.

NewTechWood Decking Repair Kit

Use this simple repair kit to clean up end caps, dents, nail holes, scratches, and other blemishes.

Colors: maple, teak, ipe, walnut, redwood, antique, light gray, charcoal, smoke white

Each repair kit comes complete with two 10cm wax sticks plus an easy-to-use applicator to finish any job with professionally-installed good looks.

NewTechWood SIDING

Elegant Home Siding That Lasts

Why settle for aluminum or vinyl siding that looks fake, when you can have the same ease of installation, plus low maintenance, and rugged durability that stands up to any weather conditions, and the natural look of natural wood?

Our home siding looks like natural wood, without the worries of real wood exposed to the elements.

NewTechWood cladding installs quickly using our exclusive clip system that creates a lasting seal between planks.

Our installation system enables your home to “breathe” as air circulates between siding and joists, keeping your home high, dry, and energy efficient.

UltraShield[®] Naturale[™] Westminster Gray Siding in Mexico

All-Weather System Boards

UltraShield® siding is the ultimate solution for exterior walls because it combines the toughness and longevity of a capped wood plastic composite with an engineered design. All Weather System allows for air circulation between the siding and joists, keeping the inside dry and isolating water from outside.

Deck Tile in Your Style

UltraShield® delivers a simple, do-it-yourself solution for unsightly spaces, like concrete balconies, or cement “decks” off the back door.

Turn these eyesores into stylish outdoor living space no matter where you live. **UltraShield**® deck tile stands up to any weather – and that’s guaranteed.

Turn that concrete slab into an elegant floor wrapped in the look of exotic hardwoods that fit your style, and your “eye”.

UltraShield® deck tiles are highly-stain resistant and ultra-low maintenance so you enjoy your outdoor living space more with each passing season.

Choose from the full palette of **Nature**™ colors to create the perfect look for your perfect space. Installs simply using an inter-locking TPO polymer matrix base and stainless steel screws. All you need is a screwdriver!

Completely flexible locking system that can be secured from any side. **UltraShield**® deck tiles adapt to your needs, not the other way around.

Matching fascia is available to complete your style statement.

UltraShield® Deck Tiles is backed by 10 year limited transferable warranty.
